WORK EXPERIENCE

Technical Customer Service Agent
Intcomex
June 2023 to Present

- *Technical support through chat, email, and phone for a range of technological products, such as smart home products and routers.*
- Analytical support, addressing reported issues or needs rather than following a set guide or script.
- Creation of Power BI dashboards to visualize historical customer information and capture key indicators such as real interactions, number of cases, resolution time, among others.
- Management of the warranty process; authorization for warranty replacements, guidance through the process, resolution of potential issues, guide the customer through the appropriate channels.
- Test of golden samples (products about to be released to the market)

SUMMARY

Professional with a background in customer service, supported by practical knowledge gained through courses and a Master's degree in Data Science and Business Analytics.

I aim to translate this solid theoretical foundation into practical applications in the field of data analysis, combining negotiation skills acquired in customer service with analytical competencies to effectively contribute to projects.
